25X1			
	÷	5. Mission C093C was flown in the Taiwan Straits area on 22 March 1973. Photographic coverage was obtained of	
		42 targets, 38 of which were programmed.	X1
		6. Mission C103C was flown on 27 March 1973 along the central China coast north from Quemoy to Shanghai. Photo-	
		graphic coverage was obtained of 107 targets. 28 of which were COMIREX.	.1
	to	B. Two missions were flown obtain standoff photography of coastal North Vietnam with the	5X1
	"H	"camera. These missions were planned to approach no closer in 12 nautical miles from the mainland or offshore islands. Excessive	
	clo	oud cover and heavy haze conditions combined with some processing	
	and	omalies resulted in less than anticipated coverage of this area.	
		1. Mission S013E was flown on 30 March 1973. Excessive cloud cover and haze were encountered after three photo	
25X1		flight lines and the mission was aborted.	
		2. Mission S023E, flown on 31 March 1973, was aborted	
		for weather after completing four photo flight lines.	
25X1	II.	GENERAL	
		A. RED DOT - Eight sorties were flown in support of contin-	25X1

IDEALIST

DEVELOPMENT SUMMARY AND PROGRESS

(1 January 1973 - 31 March 1973)

I. AIRFRAME

A. J-75Pl3B Engine - The installation of improved third stage turbine blades to increase engine life expectancy continued. During this quarter new blades were installed in nine engines, making a total of 31 completed. Additionally, an improved first stage turbine blade is available through commercial sources. This improved blade has been installed in one engine. Action is in process to procure and install two additional sets to test durability. It is anticipated that this modification will permit the extension of Hot Section Inspection (HSI) an additional 100 hours and Time Between Overhauls (TBO) an additional 200 hours. If this proves true, improved first stage blades will be installed in the remaining engines.

B. U-2R Flight Test and Operational Training Summary

- 1. IDEALIST Program accomplishments in U-2R aircraft since introduction include 10,681.7 hours on 3,290 sorties as of 31 March 1973.
 - 2. Flight test and operational data are depicted below:

	1 JAN-31 MAR FLIGHTS	1 JAN-31 MAR TIME
1 - 051	50	127.8
2 - 053	52	134.8
3 - 054	. 62	168.4
4 - 055	44	155.3
TOTAL	208	586.3

25X1	Page 2	
	II. PAYLOAD	
	A. "H" Configuration - The new lens installed in "H" Serial Number 002 produced unsatisfactory results during flight test for qualification. The configuration was returned to the contractor's facility for engineering evaluation in early December. At the end of the quarter it was still in the plant.	1.)
	B. "B" Configuration - The first B-3 system incorporating the new apochromatic f/8 lens was delivered on 23 March 1973. This lens satisfied the bench specification testing requirements prior to installation in the camera system. The first test flight of the B-3 was 27 March 1973.	
	C. Delta Research Camera - OSA is providing technical and contractual support to OSP and the NRO for the acquisition of a second f/3.5 apochromatic lens and variable slit modifications to the scan heads of the Delta camera. A fixed price contract has been accepted for the lens. OSA involvement is expected to continue until the fourth quarter of FY 1974.	25X1 25X1

	Approved For Release 2006/T(7)P: SF(RPP75B00159R000400150035-4	25 <u>X</u> 1
·	6413-73 Section 2 Page 5	25X1
25X1		25X1
25X1	2. Automatic Seat Kit - The terrain radar sensing device feasibility study is presently 40 percent complete. The design engineering section indicates that the concept is sound and the only major constraint to date is in the area of miniaturization and packaging. Test flights from a helicopter will begin during the next quarter.	23/1
25X1	3. S1010 Pilot Protective Assembly (PPA) Prototype Helmet - The first flyable model of the S1010 pressure suit helmet was delivered during March 1973 along with a modified pressure suit to mate with it. This suit was from bonded stock and sized to accommodate at least a portion of the current pilots for short flights. Test flying will begin during the fourth quarter of FY 1973 to determine pilot acceptability.	
25X1	4. RQ-225 Parachute Repack - Headquarters Life Support is considering a personal parachute repack capability for Detachment "H". At the present time five parachutes are kept operationally ready at the detachment and when due repack, which is every 90 days, they are shipped via commercial air to Lockheed Aircraft Corporation, Burbank, California. A Protective Equipment Technician who is a Master Parachutist and has previous experience in parachute repacking, has recently been assigned to Detachment "G" for further assignment to Detachment "H". If his packing technique proves to be acceptable, a considerable savings in transportation costs would be gained. Additionally, the 10 days of transit and customs delays would be eliminated.	ıs
25X1	C. Training Activities	
25X1	l. Water Survival Training - Water training was conducted at the indoor swimming pool for	25X1
25X1	Training was accomplished in the standard low flight equipment and the S1010 PPA full pressure suit, survival kit, and one man liferaft. pilots also received initial training in drown-proofing.
